host institute will handle the sessions.**

### SCOPE AND OBJECTIVES

The seminar on "Research Issues in Digital Image Processing" will act as a forum for researchers and the practitioners interested in the advances and application of image processing. It is an opportunity to observe the latest researches, results and ideas in this area.

The primary objective of the seminar is to promote scientific information exchange amongst experts, researchers, developers, engineers, students, and practitioners working in the country. The scientific program of the seminar will consist of presentations by experts in the field of computer vision and image processing. The experts will address the recent developments and trends in the fields. The participants will get enough opportunity to enhance their knowledge regarding the recent state-of-the-art in the fields through interaction with experts. This will stimulate the research potential of the candidates who wish to pursue Doctoral degree in the related fields.
