SCOPE AND OBJECTIVES

The seminar on "Research Issues in Computer and Communication Networks" will act as a forum for researchers and the practitioners interested in the advances and applications of computer / communication / Heterogenous networks and Cloud Computing. It is an opportunity to observe the latest research results and trends in these areas.

The primary objective of the seminar is to promote scientific information exchange amongst experts, researchers, developers, engineers, students, and practitioners working in the country. The technical sessions of the seminar will consist of presentations by leading experts in the field of wired / wireless / adhoc / mobile telecommunication networks and Cloud Computing. The experts will address the recent developments and trends in these fields. The participants will get enough opportunity to enhance their knowledge regarding the recent state-of-the-art trends in these fields through interaction with the experts. This will stimulate the research potential of the candidates who wish to pursue Doctoral degree / project work in the related fields.

The National seminar includes **Hands-on sessions** on Network simulation using network simulator NS-2 and Cloud Computing using Cloudsim also.

RESOURCE PERSON

Experts from Mepco & other reputed institutions will handle the technical and hands-on sessions.
